

This questionnaire is designed to allow Aon as an insurance broker to consult and inform the insurance carrier of the SPS I program as detailed as possible about the risk profile of your company and its Cyber requirements in order to obtain a Cyber insurance proposal.

It is of the utmost importance to answer all questions as correctly and completely as possible.

Incomplete or incorrect information could have a considerable impact on the validity of the insurance contract and the acceptance and handling of eventual claims by the insurer.

1. GENERAL

Policyholder :

Legal form :

CBE n° :

Activities :

Consolidated turnover according to the last available (filed) annual accounts EUR

Please tick the corresponding box:

YES

NO

Is your Operational Technology (OT) environment segmented from both your IT environment and from the internet? OT includes but is not limited to supervisory control and data acquisition (SCADA) software, programmable logic controllers (PLCs), physical plant equipment, remote terminal units (RTUs), human-machine interfaces (HMIs), embedded computing technologies, remote industrial software and hardware, and systems for monitoring and controlling any of the foregoing.

☐☐

5. DECLARATION

Provide a copy of the following of the policyholder:

- a. Latest (consolidated) annual report
- b. Most recent organizational chart of the group structure

The answers to the questions listed above are considered sufficient to inform the insurers of the risk to be insured. However, please notify us of any particular element known to you which in your opinion is likely to significantly increase the risk for the insurers.
Returning this questionnaire binds neither the policyholder nor the insurers. Cover is only acquired upon receipt of written acceptance of the quote by the insurer.

I hereby confirm that the above-mentioned information is correct and complete.
